

École Vickers

We believe

At École Vickers we aim for all staff, students, and community partners to create a learning environment that is safe, joyful, and innovative. We celebrate diversity and believe in developing the whole child.

Our shared belief is we will achieve the highest level of student academic achievement through combined use of high impact literacy strategies and opportunities to connect to the land.

What our staff learning looks like

Our teachers actualize the school goal in their instructional and assessment practices. The staff use embedded PLC time to engage in discussions about student needs, analyze data, and adjust their teaching as needed. They celebrate successes and support each other with challenges. Our staff is confident in taking risks in the classroom and outdoors, using new resources and strategies purposefully to maximize student achievement.

What does excellence look like

At École Vickers, we show excellence when we are united in a common goal; we are collaborative; we are supportive. Excellence is our students achieving their goals, growing in all areas, and reaching their full potential.
